# Libellula[ISA]

## The assistant for the best nesting

**Libellula[ISA]** is an assistant that allows the user to get the best nesting without any manual input on complicate geometrical parameters for every nested part.

**Libellula[ISA]** is always in activity and every time a new shape enters in the Parts Library it starts its analyze with a very powerful algorithm – Intelligent Shape Analyzer – able to identify the best rotation, pair, etc. parameters matched to this shape.

With **Libellula[ISA]** work, many other parameters are automatically configured like mirror, grain direction, and many others.

It is enough to install **Libellula[ISA]** to get this features and user must not learn anything.

All benefits of **Libellula[ISA]** presence will be automatically available.

Nesting results get with **Libellula[ISA]** are immediately available in the **Libellula[CUT]** environment.
